About me:

Full-Stack Web Developer with experience in frontend development using React and backend development with Django. My career began in the audiovisual industry as a producer, cameraman, and editor, collaborating with leading media organizations in my country. Today, I bring that creative and technical vision into the technology field, returning to one of my earliest passions: creation through code.

Professional Experience

Web Fullstack Developer (React, Django, PostgreSQL)

Javier Young - September 2024 – December 2024

Internship at Faro Latino – Collaborated on a music subscription management application.
· Developed views in Django, implemented migrations, and created management commands for automation.
· Integrated React forms with the corresponding backend.
· Enhanced statistical tables and filters for improved usability.
· Contributed to the design and deployment of a financial information application from scratch on an AWS EC2 instance, configuring services such as SES and Route 53.

Wordpress developer

Página Web - Dicember 2024 – July 2024
